SPECIALISTS IN

Artistic Rustic Work

As we are receiving numerous requests for prices and illustrations of rustic work of all kinds, we desire to offer to our patrons this pamphlet, trusting it will give some idea of this class of work.

We make a specialty of building rustic fences around estates; also providing rustic gates. They are very beautiful and lasting for enclosing the home grounds. Also for vegetable, fruit and flower gardens, where they can be used to advantage as a support for climbing vines and roses. A rustic fence covered with our perpetual-flowering climbing roses and sweet briars produces a beautiful and pleasing effect.

We use rustic fences exclusively in our landscape work on some of the finest estates in the country.

When it is understood that we are original in our designs and that we cater to the individual tastes of our patrons in executing orders adapted to special effects, it will be understood how impossible it is to quote fixed prices in this little pamphlet. If you do not see what you want in this pamphlet, we will be pleased to submit original sketches and prices for any special work you wish done in rustic building.

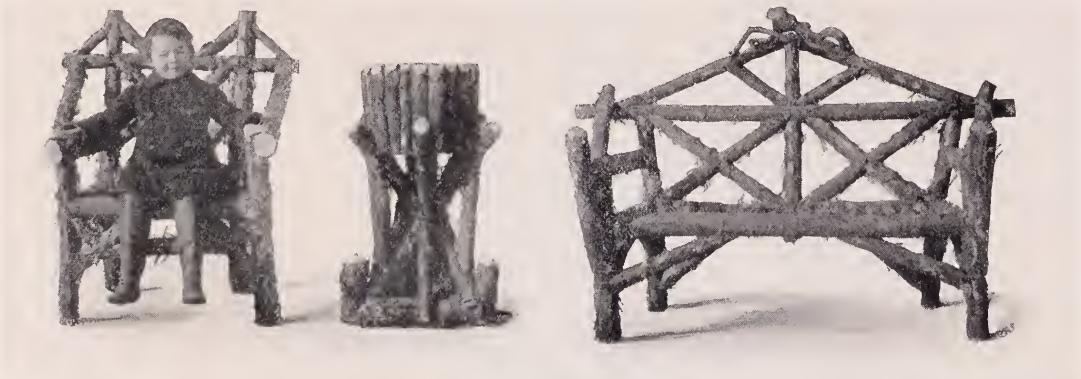
Our Builders at Work on a Rustic Summer House

Rustic Building

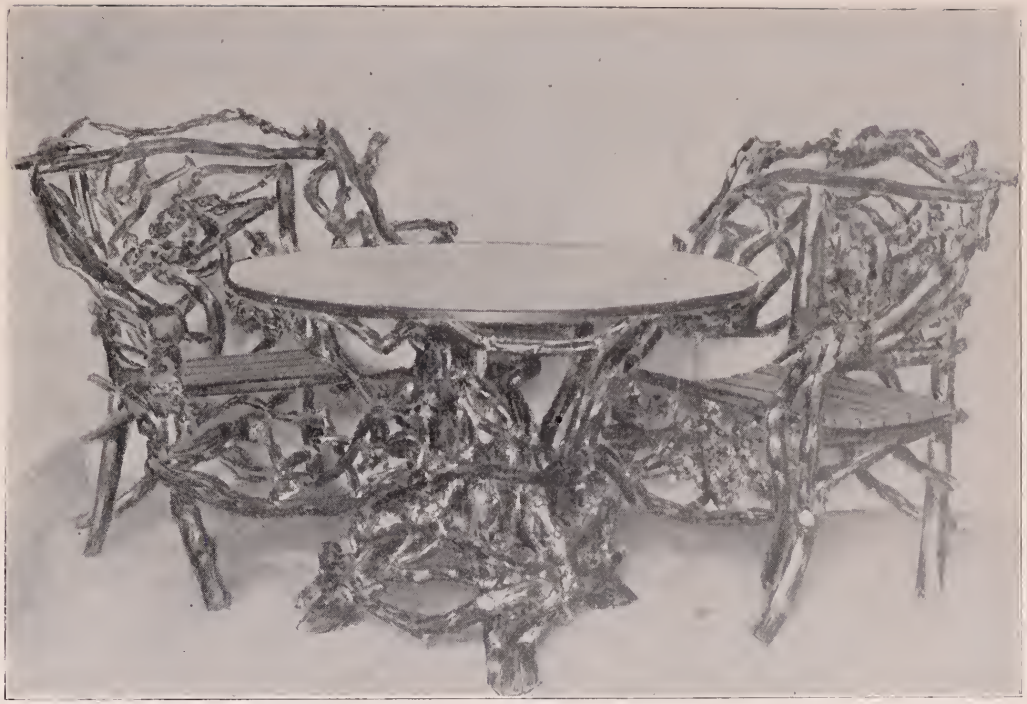
Is both a science and an art. It has become an important aid to landscape art. We have the most competent set of artistic builders in the country, and shall be pleased to carry out designs furnished, or to submit new ones of our own.

In the construction of this work we use material of lasting qualities, consisting of cedar, birch, apple, willow, laurel roots, vines, etc., and other woods of artistic appearance. We have always on hand Summer Houses, Well Covers, Bridges, Settees, Vases, Pagodas, etc., which can always be placed to advantage and add to the beauty of any landscape.

Nothing can be more pleasing to the educated eye and the town-tired limbs than the sight of one of our Rustic Summer Houses, or the luxurious comfort of one of our easy Settees.



Specimens of the Handicraft of Our Rustic Builders



The accompanying illustration shows a set of veranda furniture, built of rough cedar or laurel root, with hardwood seats and tops. Tables are made round, square and octagon, in sizes from 18 to 36 inches in diameter, or larger if desired. Arm chairs are made with seats 18, 22 and 24 inches wide.

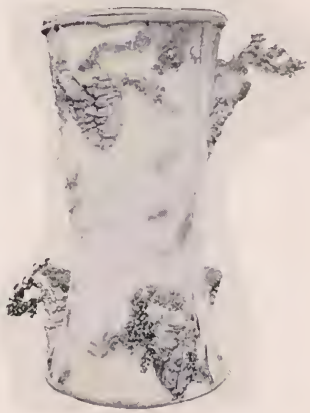
Rustic Pot Stand

BIRCH PLANT STAND

For outdoors or living room. Large Boston Ferns look very stunning in this stand.

RUSTIC POT STAND

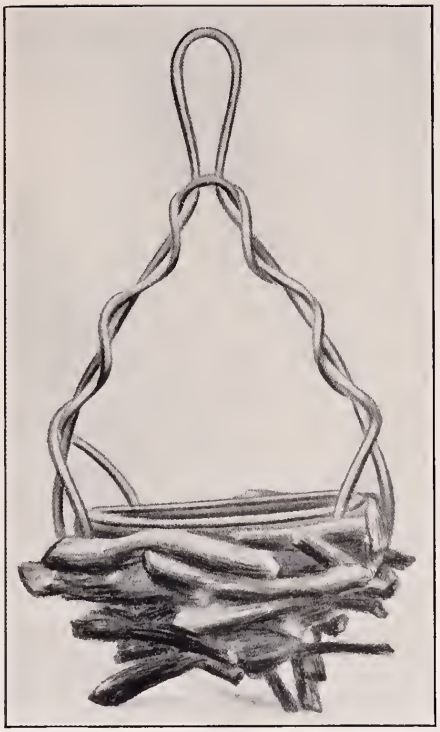
A very pleasing addition to the piazza.



Birch Plant Stand

This is an illustration of stone work in an aquatic garden, ready for the erection of a rustic canopy —a pretty resting place while drinking water at the natural spring shown in the pieture.

This "Umbrella" has seats for six people. Plaeed on a hill top, it makes a very cool and shady resting place from which to admire surrounding nature.



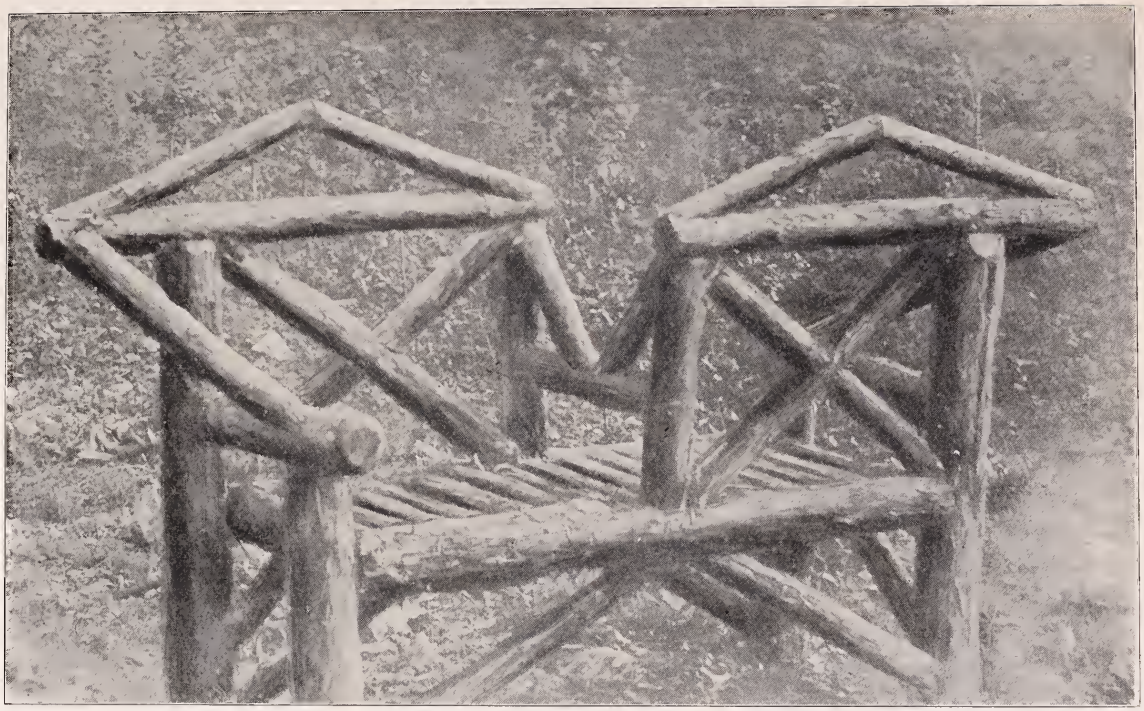
RUSTIC HANGING BASKETS

Made with laurel trimmings and rattan handles, particularly adapted for ornamenting porches.

Sizes from eight to fifteen inches in diameter.
Price, from $1.00 to $2.50 each.

WINDOW BOXES

These strong, well-built boxes are generally made three feet long by ten inches wide, and ten inches deep, but in all cases must fit snug; thus the exact measurement should be sent with order.



RED CEDAR TÊTE-Á-TÊTE

The Settee shown in this photograph is made of red cedar. It can also be made of white birch or laurel roots.

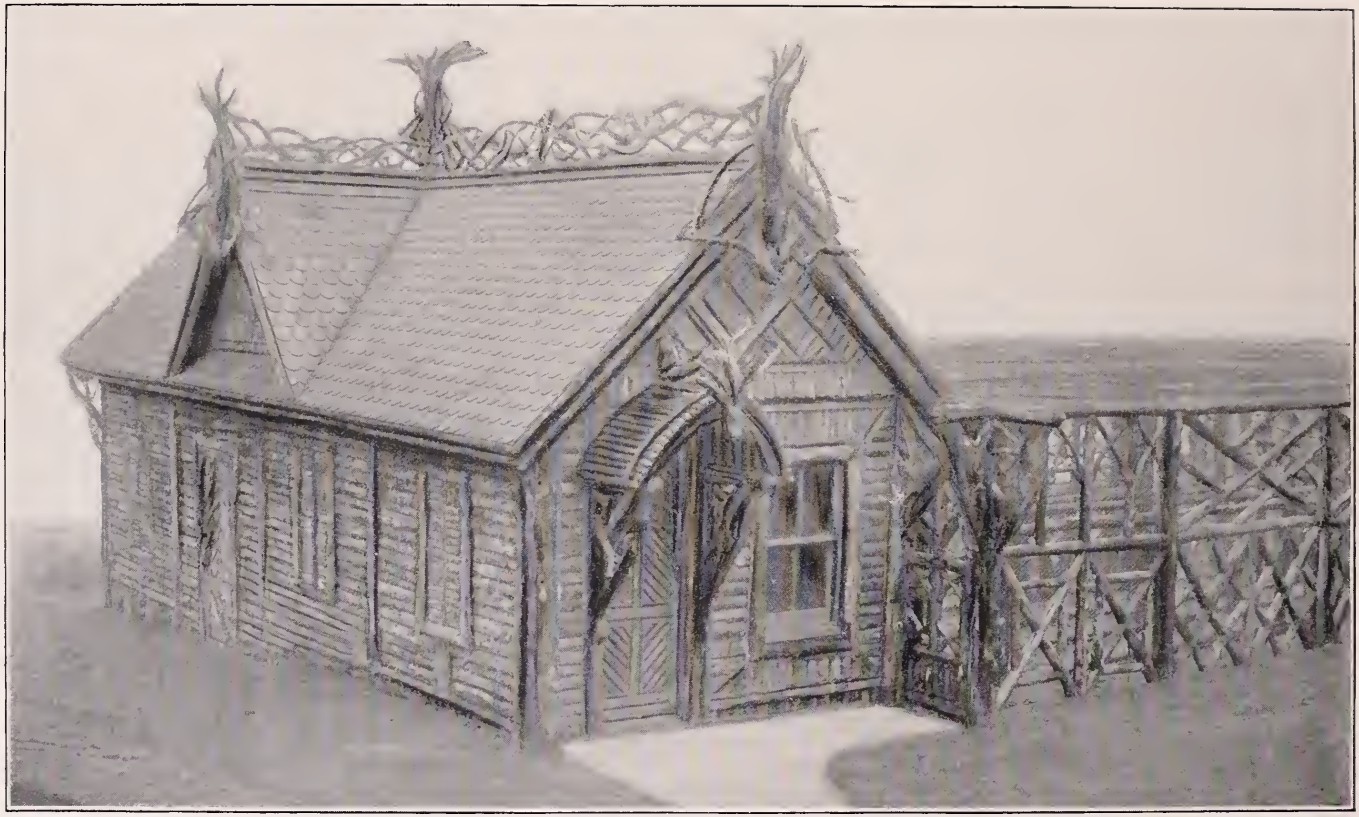
RUSTIC BRACKET

Filled with ferns and vines.

OCTAGON SUMMER HOUSE

The home grounds or country estate is incomplete that does not possess one or more charming Summer Houses, rose or vine embowered. They may be set with advantage either along a retired walk or occupy a prominent place in the flower garden. Built from special design of heavy red cedar. About fifteen feet in diameter, having a seat twenty inches deep by eighteen inches high, around the inside. The flooring may be of sand for children to play in, wood, brick or cement Illustration shows one ready to receive a cement flooring. A house of this character should last fifty years and over. Should be seen to be appreciated.

Sizes and prices on application.



This illustration shows a children's cottage and playhouse, with vine arbor leading up to it, producing a charming effect if properly placed in an old-fashioned flower garden. An ideal retreat for the young folks in stormy weather. Price on application.
